PHOTOSHOP CHOPS!
"The most creativity can come from the highest pressure."

Goals:
- Students will learn to create original images in a high pressure work environment
- Basic PhotoShop tools and techniques will be applied to original artwork
- The students will focus on realism and gathered images to create original and creative solutions to that class period's **CHOP!**

Objectives:
- The PhotoShop **CHOP!** is a one day/one project assignment. This is meant to get the student to think clearly for a solution to a problem and to create it in a quick amount of time. The business world (whether or not its Art based) is looking for creative and "outside-of-the-box" thinkers. The **CHOP!** is meant to train students to think on their toes and do so with a high level of achievement.
- At the beginning of class the instructor will introduce what the day's **CHOP!** will be. More than likely there will be at least one example of the assignment shown class along with a small amount of explanation.

- **These are the expectations of the CHOP!:**
  - *You have until five minutes before the end of the class period to finish the* ***CHOP!***
  - *No matter how far you get, a* ***.JPG version*** *must be saved of your work in the proper folder (e.g. Last name – Title.jpg)*
  - *All images will be shown at end of class*
  - *The* ***CHOPS!*** *are worth 10pts apiece and graded on:*
    - Original thinking/idea
    - Realism of image
    - Appropriateness of final image
    - Completion of assignment

- All images **MUST** be from a photo; not a painting, drawing, or video game screenshot – **REALISM** is so important!!
