

The purpose of this worksheet is to practice the Pointillism style. With each of the given boxes there will be a set of instructions for you to follow. Please work as neatly as you can. This technique will be applied to the project after this. Keep in mind that black and brown are not allowed for this assignment; only colors that are found in the color wheel! Erasing **ALL PENCIL** is the last step of this assignment!!

COMPLEMENTARY COLORS

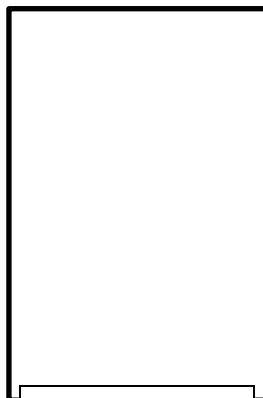

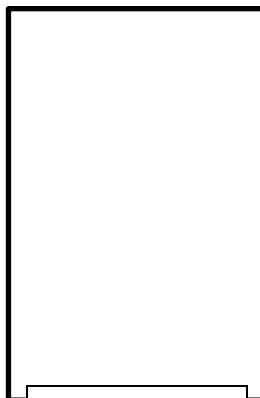

Show two sets of complementary colors in a value scale. Start with one color and add more of its opposite as you work your way down

MONOCHROMATIC COLORS

Show two value scales of a single color. The goal is to not have as many dots at the top and more as it comes towards the bottom

**Cube****Sphere****Pyramid****Cylinder****GEOMETRIC SHAPES**

Use the style to show the four listed forms. You may use a pencil to LIGHTLY draw the shape first, but then you must use the markers to create the actual shape. **ERASE ALL PENCIL!!**

**Tree****Flower****Fruit****Vegetable****ORGANIC SHAPES**

Now you will use MULTIPLE colors to create the images. For an organic object use different colors that will create shade and allow for the details to come through! Make sure to erase any pencil showing.
